Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
 - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
 - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
 - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in response to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-20, 41-43, 48-49 and 57, drawn to an automatic diagnostic apparatus, classified in class 422, subclass 62.

Group II, claim(s) 21-22, 39-40 and 55, drawn to a disposable electrochemical immunoassay biosensor, classified in class 435, subclass 287.2.

Group III, claim(s) 23-27 and 56, drawn to a prepackaged diagnostic testing kit, classified in class 422, subclass 61.

Group IV, claim(s) 28, 50-52 and 54, drawn to a container, classified in class 422, subclass 102.

Group V, claim(s) 29-36 and 53, drawn to a reagent container, classified in class 422, subclass 56.

Group VI, claim(s) 37-38 and 58, drawn to a method for diagnosing myocardial infarction, classified in class 436, subclass 528.

Group VII, claim(s) 44-47, drawn to a diagnostic centrifuge, classified in class 422, subclass 72.

Art Unit: 1743

2. The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The controller feature of Group I is not required by the claims of Groups II-VII. Further, the voltage supply means feature of Group I is not required by the claims of Group VII. The aperture counter electrode and the immunoassay system of Group II are not required by the claims of Groups I and III-VII. Similarly, the disposable sample holding means of Group III is not required by the claims of Groups I-II and IV-VII. The container having a first and second base in the claims of Group IV is not required by the claims of Groups I-III and V-VII. The disposable reagent cartridge with a removable cover feature of Group V is not required by the claims of Groups I-IV and VI-VII. The method of monitoring ex vivo levels of cardiac marker proteins in Group VI is not required by the claims of Groups I-V and VII. The centrifuge feature of the claims of Group VII is not required by the claims of Groups I-VI. None of the claims as presently written link together the inventions set forth in Groups I to VII.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
